

and May 1838
Dear Sir

D. M. Hopkins

I send the specimens of which I spoke - the red one is what I spoke of as occurring at Port Henry. The syngenesious plant (you will excuse me I suppose for using the old terms) with an acuminate leaf is the vine of which I spoke. I send a few specimens of the Goadyea (as we used to call it) perhaps you do not want them.

The screen which I have sent is that onto which ^{the} articles which I have rec. ~~are~~ fit the tube for example for showing the face of bodies has a female screw - of thin thread & calibre 8-10 of the rest. I am sorry to put you to so much trouble Sir but must try to pay you in plants - whatever you procure my Brother will take the charge of

Very truly & respectfully

Dr Lorne

Yours
D. M. Hopkins

Williams College Sept 24th 1838

Dr Torrey

Dear Sir

I received your letter two-
as at the close of the last term but did not
answer it at that time as I expected at that
time to visit Boston during the vacation
& thought it might be well to look into
some of the shops there. Having been prevented
however from going I take this opportunity to say
that I should be glad to have you pursue
the course in relation to the Air Pump which
you proposed. I am anxious to get the instrument
up the river before it closes together with the
other articles if they can be conveniently obtained.

I have taken a short pedestria tour this va-
cation & collected in my ^{way} some minerals & a few plants
one species of the Gerardia new to me which grows
on the sandy plains of the Connecticut. met sent
also another plant I think a polygonum new to me but com-
mon I see them which I have not had time to inves-
tigate. We must by all means have a volume of
your Flora when you may consider the college

Library as well as for. I hope my duty to own the
work but my extreme poverty ^{prevents me} prevents from order-
ing it. I should have to be trusted & of course
my subscription would be of no service to
you. Dr. L. has returned & understood to Albany
the campaign seems to have terminated quite
reasonably. Have the goodwishes to remember me kindly
to your family also to Dr. Gray

Your oblig'd friend
A. Hopkins
